## About Me

Rumen Kehayov founded KDD Construction in 2012 with a clear vision: to deliver high-quality façade and cladding solutions supported by strong workmanship, technical excellence, and dependable service. Under his leadership, the company has grown into a trusted specialist contractor delivering façade and remediation projects across the UK.

Following the Grenfell Tower tragedy, Rumen led the company's expansion into fire remediation and recladding, supporting building owners and developers in replacing unsafe materials and achieving compliance with modern safety regulations.

Rumen provides strategic direction across the business, with a strong emphasis on quality, safety, and regulatory compliance. He is committed to ensuring robust systems, skilled delivery, and rigorous quality control standards are embedded at every stage of a project. His leadership promotes continuous improvement, technical excellence, and strong client partnerships while supporting sustainable growth and long-term performance.

He is passionate about building a culture that prioritises professionalism, accountability, and pride in workmanship. By investing in people, strengthening processes, and maintaining uncompromising standards, Rumen continues to position KDD Construction as a reliable partner known for delivering safe, compliant, and high-quality construction solutions.
