

At KDD Construction Ltd, we are committed to conducting all cladding and façade operations in an environmentally responsible and sustainable manner. We acknowledge the environmental impacts associated with our activities and are dedicated to minimising these effects through continual improvement, compliance with applicable legislation, and the adoption of industry best practices across all projects.

1. Environmental Objectives

To uphold our commitment to the environment, KDD Construction Ltd aims to.

- Ensure full compliance with all relevant UK environmental legislation, regulations, and applicable codes of practice.
- Prevent pollution and minimise waste generated through our operations.
- Promote the efficient use of resources, including energy, water, and raw materials.
- Integrate environmental considerations into all planning, procurement, and operational decision-making processes.
- Encourage the use of sustainable and responsibly sourced cladding and façade materials whenever feasible.
- Manage hazardous and non-hazardous waste responsibly, with a focus on waste minimisation, reuse, and recycling.
- Enhance environmental awareness and accountability through regular training and engagement of all employees and subcontractors.
- Continuously monitor, review, and improve our environmental performance.

2. Implementation Strategy

To effectively deliver our environmental objectives, KDD Construction Ltd will.

- Undertake regular environmental risk assessments across all operational sites and activities.
- Develop and implement project-specific Environmental Management Plans (EMPs) as required.
- Collaborate with clients, suppliers, and stakeholders to promote and implement sustainable solutions.
- Mitigate any nuisance to surrounding communities by managing noise, dust, and visual impacts responsibly.
- Foster the adoption of innovative systems and technologies aimed at reducing our carbon footprint and environmental impact.
- Provide all personnel with appropriate environmental training and site-specific inductions.
- Establish measurable environmental performance targets and conduct periodic reviews to assess and drive progress.

3. Roles and Responsibilities

The Managing Director bears ultimate responsibility for the effective implementation and ongoing development of this Environmental Policy. All employees, subcontractors, and suppliers are required to fully comply with the environmental protocols outlined in our Integrated Management System and to support our environmental goals through proactive participation and responsible conduct.

Signed:

Rumen Kehayov
